PROFESSIONAL SUMMARY

AI Automation Engineer building production multi-agent systems and end-to-end workflow automation for international SMEs and AI-native agencies. Architects agent systems on Claude and OpenAI, orchestrates them through n8n and custom Python infrastructure, and ships operational platforms that replace 30+ hours of weekly manual ops with supervised automation. A decade across hospitality operations in Singapore, multi-currency bookkeeping for international SMEs, and a self-built AI agency — an operator who learned to engineer the way out. Certified QuickBooks ProAdvisor and Xero Advisor — useful when the automation has to handle real money correctly. Open to senior remote roles and Founding Engineer positions at AI-native startups.

WORK EXPERIENCE

Founder · AI Automation Engineer & Systems Developer

Nov 2025 – Present

True Hub Solutions

Philippines (Remote) · International Clients

- Architected and deployed OpenClaw — a production multi-agent AI gateway on Hetzner VPS with Telegram and WhatsApp bridges, custom skill system, and 22 deployed agent skills. Stack: Python · Claude · OpenAI · Linux.
- Built end-to-end WhatsApp Cloud API intake pipeline (Meta Cloud API · n8n · Notion) — replacing manual lead capture with auto-reply, zero-touch logging, and instant ops notifications.
- Delivered full operational platforms for international SME clients: AppSheet + Google Apps Script payroll/expense/leave management synced to Xero API, plus n8n automation stacks for donor and stakeholder workflows.

Founder · Automation-First Bookkeeper

Oct 2024 – Nov 2025

JChan Bookkeeping Services

Philippines (Remote)

- Specialist bookkeeping practice built on automation-first principles: AI-assisted transaction categorization, custom Xero/QBO integrations, and operational dashboards that eliminate manual close cycles.
- Designed and deployed custom operational systems — payroll manager, leave tracker, and expense approval workflows — replacing fully manual processes and measurably reducing weekly administrative hours across client operations.
- Identified recurring inefficiencies in client financial operations and engineered targeted solutions; delivered consistent improvement in reporting accuracy and month-end close time for all retained clients.

Daily Operations Manager

Feb 2023 – Feb 2026

Best Holistic Life — Lifestyle Magazine

Remote

- Managed editorial workflows, vendor relations, content scheduling, and process automation for a digital lifestyle magazine.
- Streamlined publication processes using automation tools, reducing content turnaround times and improving contributor coordination.

Small Business Owner

2022 – 2024

Jean's Delights

Bacolod City, Philippines

- Founded and operated a local F&B food cart business managing daily operations, vendor procurement, inventory, and full cash reconciliation.
- Maintained daily P&L tracking, expense records, and cash flow management — building hands-on SME bookkeeping and operational finance experience.

Assistant Front Office Manager

Dec 2018 – Nov 2021

CherryLoft Resorts and Hotels Pte Ltd

Singapore

- Managed front office operations, revenue management, reservations, night audit, and financial reporting across multi-property hotel operations in Singapore.
- Supervised and developed a front desk team of 8+; maintained high guest satisfaction scores, managed nightly audit cycles, and ensured accurate daily revenue reconciliation and shift handovers.

Earlier experience (Sep 2014 – Aug 2017): F&B and operations management roles in Singapore (Jamie Oliver / Integrated Food Concepts, Olivine Networks, Avenue Engineering) and the Philippines — available upon request.

KEY ACHIEVEMENTS

- Architected and deployed OpenClaw — a production 6-agent C-suite AI gateway with Telegram and WhatsApp bridges, lossless context management, and 22 custom skills running on a Hetzner VPS.
- Built and launched a WhatsApp Cloud API intake pipeline integrating Meta Cloud API, n8n, and Notion — eliminating manual lead capture and delivering instant auto-replies with zero-touch logging.
- Designed and deployed complete client business infrastructure from scratch: Xero bookkeeping, payroll processing, expense management, and n8n automation pipelines — replacing manual workflows with zero-touch, auditable systems.
- Developed an AppSheet + FastAPI + Xero API operational platform for a recycled materials trading client — consolidating inventory, purchasing, and financial data into a single integrated system.
- Architected and deployed a custom NGO website with n8n automation stack — replacing fragmented manual communications with a streamlined, automated donor and stakeholder engagement pipeline.
- Founded True Hub Solutions within 12 months of launching JChan Bookkeeping Services — scaling from solo freelancer to a multi-service consultancy serving clients across AU, US, SG, NZ, UK, PNG, and PH.
- Processed high-volume, multi-currency transactions with consistent accuracy for international client accounts across AU, US, SG, NZ, UK, PNG, and PH.
